DETAILED ACTION

Allowable Subject Matter

1. Claim 21, 23-28, 32-36, 40-44 and 48-49 are allowed.
2. The following is an examiner's statement of reasons for allowance: In Regards to base claims 21, 35 and 40, the prior arts fails to disclose in combination with other limitations of the claims, a surgical tack having a drive thread that is configured to prevent threaded engagement of the head into tissue, a tissue engagement thread that is formed in a same first direction with the drive thread and through bore extending through the head and barrel of the surgical tack for receipt of a drive tool.

The cited references in US Patent No. 5,536,127 to Pennig teaches a headed screw construction for use in fixing the position of an intramedullary nail but fails to disclose a through bore and the drive thread and the tissue engagement thread having the same pitch/first direction. US Patent No. 6,001,101 to Augagneur teaches a screw device with threaded head for permitting the coaptation of two bone fragments having a through bore and the drive threads and tissue engagement threads having the same pitch/first direction but fails to disclose the drive configured to prevent threaded engagement of the head into tissue. These references taken alone or in combination do not anticipate or make obvious applicant's claimed invention because doing so would destroy the invention of the primary reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3773

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
